Results-driven Project Manager with 6+ years of experience delivering complex digital platforms and enterprise software for public sector and commercial clients across the UK and Europe. Combines hands-on technical experience in software engineering and API delivery with strong Agile leadership, stakeholder management, and structured documentation practices.

Proven track record of managing cross-functional teams, translating business requirements into delivery-ready plans, and driving projects to completion on time and within scope. Equally comfortable presenting to senior client stakeholders and working directly with development and QA teams to resolve delivery blockers. Currently based in London with full right to work in the UK (PSW visa valid until Jan 2028).

EDUCATION

- **MBA, University of Surrey, UK,** Sep 24-Sep 25
- **BEng, Information Technology, Lakshmi Narain College of Technology & Science, Bhopal, India,** Jun 17

TECHNICAL SKILLS & METHODOLOGIES

Project Delivery | Agile & Scrum | Stakeholder Management | Jira & Confluence | Sprint Planning & Execution | Risk & Timeline Management | Requirement Gathering | Cross-functional Team Leadership | Client Communication | Figma | Process Improvement| Jira | Wireframe | Java | REST API | MySQL | PowerBI | Springboot | Microservices |

PROFESSIONAL EXPERIENCE

Project Manager, Thornacre Engineering (London UK) Aug 25-Mar 26

Appointed as Project Manager to lead end-to-end delivery of digital platforms for UK public sector clients, acting as the primary bridge between client stakeholders and delivery teams.

- **Delivered the InvestNI customer portal one month ahead of schedule** (7 months vs. planned 8) through proactive risk management, early identification of blockers, and continuous alignment with client priorities.
- Led full project lifecycle for multiple concurrent client engagements including Invest Northern Ireland, Dorset & Wiltshire Fire & Rescue Service, and Adopt Birmingham.
- Managed a cross-functional team of 7 (developers, designer, QA), coordinating workstreams across design, development, and testing to maintain consistent delivery cadence.
- Drove transition from Kanban to Scrum, improving sprint visibility, delivery predictability, and team accountability across all active projects.
- Ran all Agile ceremonies — daily stand-ups, sprint planning, retrospectives, and weekly client updates — maintaining momentum and clear accountability throughout delivery.
- Conducted stakeholder discovery interviews and translated complex business requirements into structured user stories, technical specifications, and prioritised Jira backlogs.
- Established Confluence-based documentation standards across the team, reducing onboarding time and improving knowledge retention between sprints.
- Acted as the primary client contact across multiple accounts, managing feedback cycles, expectation setting, and milestone reporting.

Senior Technical Consultant, Ernst & Young (EY India), Apr 22-Feb 24

Moved into direct client consultant, including on site, for two major clients – Dell and VMware – while reporting to the EY Director of Technical Consulting.

Client: Dell | Project: API Modernisation & Security Enhancement

- Coordinated an on-site team of 8 in a live production environment, managing issue prioritisation, sprint delivery, and direct client communication on behalf of EY.
- Served as the primary technical point of contact with Dell's billing team, owning progress reporting, issue resolution, and client feedback loops throughout the engagement.
- Led delivery of a large-scale API modernisation programme (SOAP to REST), managing scope, dependencies, and stakeholder sign-off across multiple delivery cycles.

Rohit GARG

+44 (0) 7909 056938 | rohitgarg090@gmail.com | Surrey GU1 4RP |LinkedIn

- Directed the identification and remediation of security vulnerabilities across production and non-production environments, ensuring compliance and data integrity outcomes.

Client: VMware | Project: Download Management

- Managed a cross-functional distributed team supporting VMware's Cloud Services DMT team across Europe, coordinating remote delivery and maintaining clear lines of accountability.
- Led Agile sprint cycles including planning, daily stand-ups, and retrospectives, consistently keeping the project on track and proactively mitigating delivery risks.
- Oversaw design and deployment of REST microservices, acting as the coordination layer between technical teams and client stakeholders.

Software Engineer, Publicis Sapient, Jun 21-Mar 22

Moved to this global digital solutions leader supporting mainly ecommerce clients in Europe.

- Engaged directly with clients' technical counterparts on functional requirements, customisation and integration of the Publicis Sapient solution/product with their other software solutions.
- Facilitated client issue resolution, coordinating between client and internal technical and business teams.
- Led on ticketing and task assignment via Jira, providing project status updates.
- Maintained documentation for system designs, patch verifications and solution deployments.

Software Engineer, Saviynt Inc., Dec 18-Jun 21

Joined this market-leading US-based cloud security solutions provider as an associate developer, achieving promotion after 1 year to software engineer.

- Developed the rules functionality underpinning the user creation and support component within Saviynt's administration module, from inception through design, RND, Development debugging, roll-out and maintenance (2.5 years); this I did as sole developer.
- Additionally part of a team developing a vendor access management module (8 months) for Shell involving the integration of third party tools, including Workforce, into their HR management platform.
- Engaged directly on functional requirements and progress with technical stakeholders from external clients and, internally, with colleagues from teams including Testing and Project Management.
- Latterly deputised for the team lead, managing the Jira board, assigning and overseeing client requests to/for developers.
